2027 Annual Western STANYS
Outstanding Science Educator Awards

Western STANYS wants to celebrate Science Teachers who are dedicated to improving their practice in the shift toward 3-dimensional, student-centered instruction. We are looking for nominations of these individuals so we can honor them at our Annual Mini-Conference on January 20, 2027 at Buffalo State University.

This year we will be honoring a teacher in each of these areas:

- Elementary
- Middle School Science
- High School Life Sciences
- High School Physical Sciences
- High School Earth & Space Sciences
- Applied Sciences

Criteria for the awards are as follows:

- A nomination form must be completed to start the process.
- The nominee must be a current member of STANYS or can join upon nomination
- Once nominated, the nominee must complete a short Application Form that will provide the Selection Committee with additional information.

You may nominate yourself or another individual by completing the Nomination Form using the link below. **Nominations are due by November 15, 2026**.

We hope that you will help us to recognize deserving Science Teachers in Erie and Wyoming County!
